Brief summary:

- Pharmaceutical companies are the most profitable in the world (for example, for a profit-hungry individual, this would *logically be the best* place to make it) (*Newsweek/BBC*)
- Pharmaceutical companies succeed in corrupting surveillance and authorization systems (*Dr. Turcotte*)
- They make *their own* clinical trials of vaccines and drugs they send to authorization systems (so the process is not independent) (*Dr. Angell*)
- According to clinical trials of pharmaceuticals, the claimed efficacy of ~ 90% is to lessen the serious effects of rare cases which worsen (elderly people, people at risk), but not to break the contagion (*Dr. Doshi, Dr. Fauci*)
- For modRNA vaccines, this is the very first time that this *still experimental* technology is used (*Dr. Fauci*)
- For adenovirus DNA vaccines, the first “authorized vaccine” was against Ebola in 2020 only. It's still very, very new as well, in terms of real applications (*New York Times*)
- Tests have been done on animals for years, it's true, but not enough on humans (*Dr. Montagnier*)
- Vaccines are not approved . They have an "emergency authorization" and clinical trials on the cohorts do not end until the turn of 2023. The vaccinated are therefore guinea pigs (*U.S. FDA / Health Canada*)
- The emergency authorization of the vaccines explicitly states that they have not been evaluated for their carcinogenic potential, their genotoxic potential (toxic for DNA), and toxic for reproduction and development of the fetus. (*From the vaccines' emergency authorizations government documents*)

Leading international researchers say:

“If you take this vaccine, you are going *to your doom*.” (Dr. Bhakdi, researcher and professor emeritus, was at the Max-Planck Institute and director of the Institute of Microbiology and Hygiene in Germany)

“It's too early. We do not have enough perspective on these technologies. Children, and even old people, for that matter, must not die from the vaccine. It is absolutely unethical.” (Dr. Montagnier, virological researcher, discoverer of the HIV virus Institut Pasteur, Nobel Prize)

“People 70 and over who are vaccinated are likely to start dying within 2 to 3 years of being vaccinated. For those younger, for example 30 years old, it will be in 5 to 10 years.” (Dr. Cahill, immunologist and molecular biologist, Dublin University College)

“In all countries where these Covid-19 vaccines have been marketed, all batches thus "released" must be withdrawn immediately; and that these AMMs (emergency authorizations) which have been granted be suspended, or even canceled, urgently until further notice.” (Territorial Center for Independent Information and Pharmaceutical Advisory, France)

“Women who take this vaccine could become infertile because the spike protein looks like another protein, syncytin, which is necessary for the embryo to attach to the placenta.” (Dr. Yeadon and Dr. Wodarg, ex-scientific director at Pfizer and epidemiologist ex-chairman of the sub-committee on Health of Europe)

“The phenomenon of the *immune escape* would transform the vaccinated into immune bombs, into veritable variant factories, while still being vectors of transmission” (Dr. Van den Bossche, vaccinologist at the Global Alliance for Vaccination and Immunization and the Bill & Melinda Gates Foundation)

“The phenomenon of Antibody-dependent Amplification (ADE) explains why we have never succeeded in finalizing a vaccine against the other coronaviruses of SARS 2004 or MERS 2012. Vaccinated animals, when they had been confronted with another coronavirus, had a compromised immune response and died of sepsis and heart problems (" *overwhelmed* ").” (Dr. Merritt, Dr. Cardozo, Dr. Veazey, Dr. Couch *et al* .)

Dare to think for yourself (**dare to question**), do not blindly follow the media which all say the same thing and hide what they don't speak about. FOR YOUR OWN SAKE AND THAT OF YOUR LOVED ONES, DO NOT GET VACCINATED. CANCEL YOUR APPOINTMENT. ♡
